

Traffic Safety improvements coming to 17th/Franklin!

DDOT has issued a Notice of Intent to install a right-in/right-out diverter, with public comment until June 18th.

This would **eliminate left turns** in all directions and **eliminate driving straight on 17th** through Franklin, both of which cause many dangerous situations and crashes.

We can push DDOT on going further to slow down drivers on Franklin and make the intersection safer for all users:

- 20mph speed limit signage on Franklin
- More flexposts at the intersection and at 16th PI
- Speedhumps just north on 17th to slow down approach
- Prioritizing sidewalk installation in the gaps here
- Addressing 18th/Franklin near-term
